Re: Response to Review Request 093-23454-00010
Permit Status Evaluation
Plant ID 093-00010

Dear Ms. Evans,

Manchester Tank and Equipment Company, which operates a metal pressure vessel manufacturing plant located at 905 X Street, Bedford, IN 47421-2451, submitted a review request on August 2, 2006. The request was submitted to determine if Manchester Tank and Equipment Company requires an air pollution permit for the addition of one (1) multi-gas laser trimmer, with a maximum cutting capacity of 13 pounds of steel per hour, controlled by a baghouse with an air flow rate less than 4000 cfm.

The laser trimmer does not produce fugitive emissions and is equipped with a dust collection device. Therefore, it is expressly classified as a trivial activity under 326 IAC 2-7-1(40)(P)(iv). It is also classified as an exempt unit under 326 IAC 2-1.1-3(e)(45)(D).

Pursuant to the provisions of 326 IAC 2-7-11(a)(8)(A), the addition of the laser trimmer is hereby acknowledged. No revision of the Part 70 permit was necessary to accommodate the change, since it is classified as an insignificant activity that is not specifically regulated. All conditions of the permit shall remain unchanged and in effect. Please attach a copy of this letter to the front of the original permit.

If you have any questions on this matter, please contact Allen R. Davidson, Office of Air Quality, 100 North Senate Avenue, Room N1001, Indianapolis, IN 46204-2251, or call (800) 451-6027, press 0 and ask for extension 3-5693, or dial (317) 233-5693.

Sincerely,

Original signed by

Nisha Sizemore, Chief
Permits Branch
Office Of Air Quality
